

# Abdulaziz Karimbaev

DEVOPS & BACKEND

## ABOUT

DevOps Engineer with a strong foundation in backend development and over 1.5 years of professional experience in CI/CD automation, infrastructure management, and server deployment. Skilled in tools like Jenkins, GitLab CI, Docker, and Ansible, with hands-on expertise in PostgreSQL optimization, system monitoring, and containerized environments. Passionate about building reliable, automated systems that help teams deliver faster and with confidence.

Bash scripting

## RESUME

## WORK EXPERIENCE

### KPI.com / DataSite Technology

Jun 2023 - present · Tashkent, Uzbekistan (Hybrid)

#### DevOps Engineer

Managing CI/CD pipelines using Jenkins and GitLab CI for multi-environment deployments (dev, staging, live). Implemented infrastructure automation using Ansible and Docker to streamline deployments. Responsible for PostgreSQL performance tuning, Nginx configuration, and Sentry monitoring. Collaborated with developers to improve build performance and release automation.

### Sitelabs

Apr 2023 – Jun 2023 · Namangan, Uzbekistan (On-site)

#### DevOps Engineer Intern

Gained hands-on experience in CI/CD workflows, system monitoring, and deployment scripting. Assisted in automating server tasks and improving internal development pipelines.

### Sitelabs

Sep 2022 – Jun 2023 · Hybrid

#### Java Backend Developer

Developed backend logic for web applications using Java and PostgreSQL. Contributed to REST API development and backend optimizations.

### ISystem IT Academy

Jun 2022 – Sep 2022 · Remote

#### Java Backend Developer Intern

Built backend modules and gained experience in Java, Spring Boot, and PostgreSQL.

## EDUCATION

### ISystem IT Academy

Junior Java Backend Developer (Jul 2021 – Jun 2022)

### Learning Skills Lab

Intermediate English Language (Aug 2020 – Feb 2021)
